Gujranwala, Pakistan

Professional Summary

Final-year BS Computer Science student and full-stack developer with hands-on experience across the MERN and MySQL/Sequelize stacks. Comfortable owning a project end-to-end — from designing layered backend architectures and RESTful APIs, to containerizing applications with Docker and automating deployments with GitHub Actions CI/CD. Recently deepened skills in production-oriented practices, including a four-layer Route → Validator → Controller → Service backend pattern, Docker Hub image publishing, and Nginx reverse proxying. Currently building foundational knowledge of AWS and cloud computing. Seeking a Junior Developer or Full-Stack Developer role to contribute to impactful products within a collaborative engineering team.

Technical Skills

Frontend: React.js (Vite), JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Axios, Responsive UI Design

Backend: Node.js, Express.js, RESTful API Design, Middleware, MVC & Layered Architecture (Route → Validator → Controller → Service)

Databases: MySQL, Sequelize ORM, Schema Design, CRUD Operations

Cloud & DevOps: Docker, Docker Compose, Multi-Stage Builds, Nginx, GitHub Actions (CI/CD), Docker Hub, Git, GitHub; AWS & Cloud Computing (Learner), DevOps (Learner)

Tools: npm, Postman, VS Code

Experience

Full-Stack Developer — Independent / Freelance Projects

Jan 2026 – Present

Punjab, Pakistan

- Built a full-stack Sales Management System (React, Node.js/Express, MySQL, Sequelize), refactoring 10 backend modules into a four-layer Route → Validator → Controller → Service architecture with centralized error handling.
- Containerized the application with multi-stage Dockerfiles and an Nginx reverse proxy, and created a docker-compose.hub.yml enabling end users to deploy the app without cloning the source.
- Set up a GitHub Actions CI/CD workflow to automatically build and push Docker images to Docker Hub on every commit to main.
- Authored internal technical documentation (project workflow guide, Docker commands reference) covering local development, Docker Compose, and Docker Hub deployment workflows.

Projects

Sales Management System

2026

React.js, Node.js, Express.js, MySQL, Sequelize, Docker, GitHub Actions, Nginx

- Designed a four-layer backend architecture (Route → Validator → Controller → Service) across 10 modules with centralized error handling for consistency and maintainability.
- Dockerized the full stack with multi-stage builds and an Nginx reverse proxy; published versioned images to Docker Hub via an automated CI/CD pipeline.

Personal Portfolio Website

2026

React.js (Vite), Tailwind CSS, react-scroll

- Designed and built a personal developer portfolio with smooth in-page scroll navigation and a responsive, component-based layout.

Customer Enquiry System

2026

React.js, Node.js, Express.js, MySQL, Sequelize

- Built a full-stack application to log, track, and manage customer enquiries with status updates and searchable records.
- Designed relational MySQL schemas with Sequelize and RESTful CRUD endpoints connecting the React frontend to the Express backend.

Education

International Institute of Science, Arts and Technology

2022 – Dec 2026

Bachelor of Science in Computer Science — Gujranwala, Pakistan

- CGPA: 3.73
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Web Technologies, Software Engineering.

Govt. Post Graduate College for Boys, Satellite Town

Aug 2019 – Jun 2021

Intermediate (FSC) – Pre-Engineering — Gujranwala, Pakistan

- Grade: B

King Edward Grammar School

Mar 2013 – Feb 2018

Matriculation – Computer Science — Gujranwala, Pakistan

- Grade: A

Additional Information

Open To: Junior Developer Roles, Full-Stack Developer Roles, Remote & On-site Opportunities

Languages: English (Professional Working), Urdu (Native/Bilingual)
